Petition to Arizona Legislature (House and/or Senate)

Petition summary and background	The Arizona Confederation of Motorcycle Clubs (ACMC) respectfully requests that you sponsor our draft Anti-Profiling proposal. This legislation has been proposed in order to address a serious issue that exists within the Arizona Department of Public Safety (DPS), and especially within the Gang and Immigration Intelligence Team Enforcement Mission (GIITEM) towards the Motorcycling Community including significant impact to Motorcycle Clubs within Arizona. Our members are being profiled based on their appearance, without any probable cause, or even reasonable suspicion, to believe they have committed any crime and it continues to plague our community consistently. This Anti-Profiling Proposal would address the problem by ensuring that street level officers are aware of the problem, and can take the appropriate steps to avoid it through training of both new and current law enforcement. Such legislation can only benefit all concerned by eliminating violations of constitutional/state individual rights that are being infringed on and diminish lawsuits involving profiling of motorcyclists within DPS and GIITEM officers.			
Action petitioned for	We, the undersigned, are concerned, registered voters who urge our leaders to act now to resolve our issue with DPS and GIITEM to stop this activity immediately in the best interest of the motorcycling community within Arizona. We have tried to work with BOTH agencies and they have stated "there isn't an issue or problem". The ACMC can prove different.
